SUMMARY

Final-year B.Tech IT student with hands-on experience in full-stack web development (React.js, Node.js, MongoDB, Django) and Machine Learning & Applied AI. Strong foundation in software development, model building, problem-solving, and building practical, real-world applications.

EDUCATION

Institute of Engineering and Technology, University of Calicut <i>Bachelor of Technology in Information Technology</i>	Malappuram, Kerala 2023 – 2027
--	-----------------------------------

EXPERIENCE

BharatCares – IBM SkillsBuild <i>Machine Learning and Applied AI Intern</i>	Aug. 2026 – Present Remote
- Completing a 6-week Machine Learning and Applied AI internship in collaboration with AICTE, IBM SkillsBuild, and BharatCares. - Building and training AI models using IBM watsonx/Watson Studio and Teachable Machine across supervised, unsupervised, deep, and reinforcement learning. - Developing a project-based ML solution aligned with the UN Sustainable Development Goals (SDGs).	
Zoople Technologies <i>Python Django Intern</i>	Nov. 2025 – Dec. 2025 Kozhikode, Kerala
- Developed database-driven web applications using Python, Django, HTML, CSS, and SQLite. - Implemented backend functionality and CRUD operations using Django's MVT architecture. - Debugged and integrated databases across real-world development workflows.	

PROJECTS

Portfolio Creator – Evaluation & Job Portal <i>React.js, Node.js, Express.js, MongoDB</i>
- Built a full-stack platform for creating, customizing, previewing, and sharing professional portfolios. - Implemented JWT-based authentication and secure user profile management. - Built a portfolio evaluation system with feedback, ratings, and improvement suggestions. - Integrated a job portal feature matching opportunities to user skills and interests. - Built portfolio preview, PDF export, and RESTful backend services using Node.js, Express.js, and MongoDB.
RAG Evaluation Framework – Automated Retrieval & Faithfulness Benchmarking <i>Python, FastAPI, ChromaDB, React</i>
- Built a RAG pipeline with an automated evaluation harness benchmarking retrieval and faithfulness across chunking, embedding, and reranking strategies. - Built the backend with FastAPI, fastembed embeddings, ChromaDB vector store, and the Groq API for generation. - Built a React dashboard to visualize benchmark results, with PDF upload for querying custom documents. - Benchmarked embedding models, identifying a retrieval recall drop from 100% to 83.33% with a weaker model. - Deployed backend on Render and frontend on Vercel with a live public demo.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL
Frontend: HTML5, CSS3, React.js
Backend: Node.js, Express.js, Django, FastAPI, fastembed, Groq API
Databases: MongoDB, SQLite, MySQL, ChromaDB
Tools: Git, GitHub, VS Code, Render, Vercel

ACTIVITIES & CERTIFICATONS

National Service Scheme (NSS) – Volunteer	2023 – 2025
Generative AI in Action – IBM SkillsBuild	Aug. 2026
The Complete Full-Stack Web Development Bootcamp – Udemy	Sept. 2026
